3. Tech Stack	20

1. Use-Case Diagram

2. Use Case Textual Descriptions

2.1 Main Page Package

1. **Use Case Name:** View Information
 2. **Participating Actor:** Student, Counselor, and Bilkent Information Web Page User
 3. **Flow of Events:**
 - 3.1. The actor enters the website.
 - 3.2. The actor enters the information label.
 4. **Entry Condition:** The actor should enter the website.
 5. **Exit Condition:** The actor views the information.
 6. **Quality Requirements:**
 - 6.1. The information page should load within 2 seconds to ensure usability.
 - 6.2. The page should be accessible on multiple devices (desktop, mobile, tablet).
-

1. **Use Case Name:** View Upcoming Events
 2. **Participating Actor:** Student, Counselor, and Bilkent Information Web Page User
 3. **Flow of Events:** **Inherited** from View Information use case. On the information label, the actor clicks the section devoted to upcoming events based on the current date.
 4. **Entry Condition:** The actor should enter the information section inside the main page.
 5. **Exit Condition:** **Inherited** from View Information use case.
 6. **Quality Requirements:**
 - 6.1. The information page should load within 2 seconds to ensure usability.
 - 6.2. Events should be displayed in a chronological format regarding the current date.
-

1. **Use Case Name:** View Terms, Conditions and FAQ
 2. **Participating Actor:** Student, Counselor, and Bilkent Information Web Page User
 3. **Flow of Events:** **Inherited** from View Information use case. On the information label, the actor clicks the section for retrieving Bilkent University's terms, conditions and FAQ.
 4. **Entry Condition:** The actor should enter the information section inside the main page.
 5. **Exit Condition:** The actor closes the main page.
 6. **Quality Requirements:**
 - 6.1. The information page should load within 2 seconds to ensure usability.
 - 6.2. The FAQ section should allow for keyword searches to help users find answers quickly.
-

1. **Use Case Name:** View Contact Information
2. **Participating Actor:** Student, Counselor, and Bilkent Information Web Page User
3. **Flow of Events:** **Inherited** from View Information use case. The actor clicks the section on the information label to retrieve Bilkent University's contact information.

4. **Entry Condition:** The actor should enter the information section inside the main page.
 5. **Exit Condition:** The actor closes the main page.
 6. **Quality Requirements:**
 - 6.1. The information page should load within 2 seconds to ensure usability.
 - 6.2. Each contact information should be separated by text fields to ensure it covers all relevant details such as email addresses, phone numbers, and physical addresses.
-

1. **Use Case Name:** Submit Application
 2. **Participating Actor:** Student, Counselor, and Google Forms
 3. **Flow of Events:**
 - 3.1. The actor enters the website.
 - 3.2. The actor enters the application label.
 - 3.3. The actor is redirected to the submit application section.
 - 3.4. The actor submits the application through Google Forms
 4. **Entry Condition:**
 - 4.1. The actor should enter the website.
 - 4.2. The actor should enter the application tab.
 5. **Exit Condition:** The actor selects which type of application they will apply.
 6. **Quality Requirements:**
 - 6.1. It is essential for prospective students and high school counselors to apply for tours of Bilkent University with a maximum of 3 clicks.
-

1. **Use Case Name:** Submit Tour Application
 2. **Participating Actor:** Counselor and Google Forms
 3. **Flow of Events:** **Inherited** by the Submit Application case
 - 3.1. The actor selects the high school tour form.
 4. **Entry Condition:** **Inherited** by the Submit Application case
 5. **Exit Condition:** The actor submits a tour application.
 6. **Quality Requirements:**
 - 6.1. It is essential for prospective students and high school counselors to apply for tours of Bilkent University with a maximum of 3 clicks.
-

1. **Use Case Name:** Submit Individual Tour Application
 2. **Participating Actor:** Student and Google Forms
 3. **Flow of Events:** **Inherited** by the Submit Application case
 - 3.1. The actor selects the individual tour form.
 4. **Entry Condition:** **Inherited** by the Submit Application case
 5. **Exit Condition:** The actor submits an individual tour application.
 6. **Quality Requirements:**
 - 6.1. It is essential for prospective students and high school counselors to apply for tours of Bilkent University with a maximum of 3 clicks.
-

1. **Use Case Name:** Submit Fair Application
 2. **Participating Actor:** Counselor and Google Forms
 3. **Flow of Events:** **Inherited** by the Submit Application case
 - 3.1. The actor selects the fair tour form.
 4. **Entry Condition:** **Inherited** by the Submit Application case
 5. **Exit Condition:** The actor submits a fair application.
 6. **Quality Requirements:**
 - 6.1. It is essential for prospective students and high school counselors to apply for tours of Bilkent University with a maximum of 3 clicks.
 - 6.2. The system must provide a specialized option for Fair Application that allows counselors to submit event participation requests.
-

1. **Use Case Name:** Login
 2. **Participating Actor:** Bilkent Information Web Page User, Spring Authenticator
 3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. The actor presses the login button on the main page.
 4. **Entry Condition:** The actor should be authorized to log in.
 5. **Exit Condition:** The actor should enter their credentials.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Non-Existing Username
 2. **Participating Actor:** Spring Authenticator
 3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. After entering their credentials, the actor presses the login button on the main page.
 - 3.3. (Extending the Login Case) After the attempt, if the system can't find the username given, it will throw an exception.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should enter a non-existing username.
 5. **Exit Condition:** The actor entered their credentials incorrectly.
 6. **Quality Requirements:** The system should detect when a username does not exist and provide a clear, user-friendly error message, such as "Username not found. Please check your credentials."
-

1. **Use Case Name:** Forgot Password
2. **Participating Actor:** Spring Authenticator
3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. After entering their credentials, the actor presses the login button on the main page.
 - 3.3. (Extending the Login Case) Before the attempt, if the actor presses forgot password button, forgot password case activates.

4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should press forgot password button.
 5. **Exit Condition:** After pressing the forgot password button, the actor will be redirected to the new case.
 6. **Quality Requirements:** The system should ensure that the password reset email is delivered promptly and includes an expiration period of 15 minutes for security.
-

1. **Use Case Name:** E-Mail Verification
 2. **Participating Actor:** Mail Service, Spring Authenticator
 3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. After entering their credentials, the actor presses the login button on the main page.
 - 3.3. (Extending the Login Case) Before the attempt, if the actor presses forgot password button, forgot password case activates.
 - 3.4. (Extending the Forgot Password Case) After the attempt, the actor will get an e-mail verification code to enter a new password.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should press forgot password button.
 - 4.3. The actor should have a registered e-mail in the database.
 5. **Exit Condition:** After pressing the e-mail verification button, the actor will be redirected to the new case.
 6. **Quality Requirements:** Verification codes should be time-limited (e.g., expire within 15 minutes) and unique to each request. The system should limit the number of failed attempts to prevent brute-force attacks.
-

1. **Use Case Name:** Two Password Mismatch
2. **Participating Actor:** Mail Service and Spring Authenticator
3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. After entering their credentials, the actor presses the login button on the main page.
 - 3.3. (Extending the Login Case) Before the attempt, if the actor presses forgot password button, forgot password case activates.
 - 3.4. (Extending the Forgot Password Case) After the attempt, the actor will get an e-mail verification code to enter a new password.
 - 3.5. (Extending the E-Mail Verification Case) After the attempt, the actor will get a two password do not match error.
4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should press forgot password button.
 - 4.3. The actor should have a registered e-mail in the database.
 - 4.4. The actor should enter a new password, and they shouldn't be matched.
5. **Exit Condition:** The actor needs to type the same password to the text fields twice.
6. **Quality Requirements:**

- 6.1. The system should handle password mismatch errors by displaying a clear and immediate error message, such as "Passwords do not match. Please try again."
 - 6.2. The password reset process should be dynamic and load within 2 seconds.
-

1. **Use Case Name:** Verification Error Code
2. **Participating Actor:** Mail Service and Spring Authenticator
3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. After entering their credentials, the actor presses the login button on the main page.
 - 3.3. (Extending the Login Case) Before the attempt, if the actor presses forgot password button, forgot password case activates.
 - 3.4. (Extending the Forgot Password Case) After the attempt, the actor will get an e-mail verification code to enter a new password.
 - 3.5. (Extending the E-Mail Verification Case) After the attempt, if the actor mistypes the verification code.
4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should press forgot password button.
 - 4.3. The actor should have a registered e-mail in the database.
 - 4.4. The actor should mistype the verification code.
5. **Exit Condition:** The actor needs to type the correct verification code.
6. **Quality Requirements:**
 - 6.1. The system should detect incorrect or mistyped verification codes and display a clear, user-friendly error message "Incorrect verification code. Please try again."
 - 6.2. The system should ensure that the verification code is correctly sent to the registered email, with an expiration time of 15 minutes. The actor should be prompted to request a new code if the code expires.

2.2 Management Package

1. **Use Case Name:** Evaluate Event Application
 2. **Participating Actor:** - (As different actors initiate this use case's specialized use cases.)
 3. **Flow of Events:**
 - 3.1. The related actor chooses a pending event application to evaluate.
 - 3.2. The system displays the application details.
 - 3.3. The actor makes a selection.
 - 3.4. The related actors are notified as a result of acceptance or rejection.
 4. **Entry Condition:** There is at least one pending event application in the system, and an actor decides to evaluate it.
 5. **Exit Condition:** An event is accepted/rejected.
 6. **Quality Requirements:** A decision about an event application must be made at least two weeks before the event date.
-

1. **Use Case Name:** Evaluate Tour Application
 2. **Participating Actor:** Advisor and Head Secretary
 3. **Flow of Events:**
 - 3.1. The advisor evaluates a tour application.
 - 3.2. If the advisor accepts the tour application:
 - 3.2.1. The system notifies the Head Secretary.
 - 3.2.2. The Head Secretary decides to accept or reject the tour.
 - 3.2.3. The high school (Counselor) is notified about this selection.
 - 3.2.4. If the tour is accepted, guides are notified, and the tour is made visible by the system so that guides can assign themselves.
 - 3.3. If the advisor rejects the tour application:
 - 3.3.1. The high school (Counselor) is notified by email about the rejection.
 4. **Entry Condition:** The Advisor has a pending tour application and decides to evaluate it.
 5. **Exit Condition:** A tour application is accepted or rejected, and the high school is notified of the selection.
 6. **Quality Requirements:** The Head Secretary is notified within a second after the advisor's decision.
-

1. **Use Case Name:** Evaluate Fair Application
 2. **Participating Actor:** Coordinator or Director
 3. **Flow of Events:**
 - 3.1. The participating actors evaluate a fair application.
 - 3.2. The high school (Counselor) is notified about this selection.
 - 3.3. If the fair is accepted, guides are notified, and the fair is made visible by the system so that guides can assign themselves.
 4. **Entry Condition:** The system has a pending fair application, and the Coordinator or Director decides to evaluate it.
 5. **Exit Condition:** The evaluation is done, and the high school is mailed.
 6. **Quality Requirements:** A decision by an actor must be reflected in the system within a second to prevent another actor's decision about the same fair.
-

1. **Use Case Name:** Notify Office Members
2. **Participating Actor:** Notification System
3. **Flow of Events:**
 - 3.1. A new event is accepted, or an already scheduled event is canceled.
 - 3.2. The related office members are notified about the change by the notification system.
4. **Entry Condition:**
 - 4.1. The Head Secretary accepts a tour application or cancels a scheduled tour (not rejection).
 - 4.2. The Coordinator or Director accepts a fair application or cancels a scheduled fair (not rejection).
5. **Exit Condition:** The office members are notified.

6. **Quality Requirements:** The system must notify the actors within a second to inform office members about the change.
-

1. **Use Case Name:** Email High School
 2. **Participating Actor:** Mail Service
 3. **Flow of Events:**
 - 3.1. A decision is made on an event application.
 - 3.2. Mail Service notifies the high school about the decision.
 4. **Entry Condition:** An event application is evaluated, or a scheduled event is canceled.
 5. **Exit Condition:** The high school (Counselor) is notified via email successfully.
 6. **Quality Requirements:** The high school must be mailed within a minute after the decision.
-

1. **Use Case Name:** Cancel an Event
 2. **Participating Actor:** - (As different actors initiate this use case's specialized use cases.)
 3. **Flow of Events:**
 - 3.1. An actor decides to cancel an already scheduled event.
 - 3.2. The system removes the event.
 - 3.3. The notification system notifies necessary office members, and the high school is emailed on cancellation.
 4. **Entry Condition:** An event was accepted previously, but an office member decides to cancel it.
 5. **Exit Condition:** The event is removed from the system, and necessary actors are notified.
 6. **Quality Requirements:** An event cannot be canceled 3 days before the event date. The cancellation must be reflected in the system within 1 second to accept new event applications for the same time slot.
-

1. **Use Case Name:** Cancel Upcoming Tour
 2. **Participating Actor:** Head Secretary
 3. **Flow of Events:**
 - 3.1. The Head Secretary decides to cancel an already scheduled tour.
 - 3.2. The system removes the tour.
 - 3.3. The notification system notifies the assigned guides for the tour, and the high school is emailed about tour cancellation.
 4. **Entry Condition:** A tour was accepted previously, but the head secretary decides to cancel it.
 5. **Exit Condition:** Inherited from Cancel an Event use case.
 6. **Quality Requirements:** Inherited from Cancel an Event use case.
-

1. **Use Case Name:** Cancel Upcoming Fair
2. **Participating Actor:** Coordinator and Director
3. **Flow of Events:**
 - 3.1. The participating actors decide to cancel an already scheduled fair.
 - 3.2. The system removes the fair.

- 3.3. The notification system notifies the assigned guides for the fair, and the high school is emailed about fair cancellation.
 - 4. **Entry Condition:** A fair was accepted previously, but the head secretary decides to cancel it.
 - 5. **Exit Condition:** Inherited from Cancel an Event use case.
 - 6. **Quality Requirements:** Inherited from Cancel an Event use case.
-

- 1. **Use Case Name:** Mark the Tour As Completed
 - 2. **Participating Actor:** Guide
 - 3. **Flow of Events:**
 - 3.1. The guide marks the tour as completed.
 - 3.2. The system changes the status of the tour, and it removes the tour from the upcoming tours list.
 - 4. **Entry Condition:** The guide chooses a tour to mark it as completed.
 - 5. **Exit Condition:** The tour is marked as completed successfully.
 - 6. **Quality Requirements:** A guide cannot complete a tour that he or she is not assigned to. Furthermore, the tour must have already started to be marked as completed.
-

- 1. **Use Case Name:** Display the QR Code for Feedback Form
 - 2. **Participating Actor:** Guide/Director/Coordinator
 - 3. **Flow of Events:**
 - 3.1. A participating actor decides to display the QR code for event feedback.
 - 3.2. The system displays the QR code.
 - 4. **Entry Condition:** The actor has an event of responsibility in the system.
 - 5. **Exit Condition:** The QR Code is shown successfully.
 - 6. **Quality Requirements:** The QR Code must stay active for at least 15 minutes.
-

- 1. **Use Case Name:** View Tours
- 2. **Participating Actor:** Director, Coordinator, Guide, Advisor, Head Secretary.
- 3. **Flow of Events:**
 - 3.1. The user selects the "View Tours" option from the menu.
 - 3.2. The system retrieves and displays a list of all available tours.
 - 3.3. The system **includes** the Filter Tours use case to allow the user to narrow down the tour list based on criteria (e.g., date, type).
 - 3.4. The user selects a specific tour from the list to view its detailed information.
 - 3.5. The system displays the tour details, including the date, time, participant count, and status.
- 4. **Entry Condition:** The user has navigated to the tour viewing section.
- 5. **Exit Condition:** The user has viewed the desired tour information and returns to the previous menu.
- 6. **Quality Requirements:** The list of tours should be displayed within 2 seconds after the user initiates the view. Also, the system must update the tour list in real time if new tours are added or removed.

-
1. **Use Case Name:** Filter Tours
 2. **Participating Actor:** Director, Coordinator, Guide, Advisor, Head Secretary.
 3. **Flow of Events:**
 - 3.1. The user chooses the "Filter" option to refine the list of tours.
 - 3.2. The system prompts the user to select filtering criteria, such as date or status.
 - 3.3. The user inputs the desired filter criteria and confirms their selection.
 - 3.4. The system applies the filters and displays a refined list of tours matching the specified criteria.
 4. **Entry Condition:** The list of tours is displayed to the user.
 5. **Exit Condition:** The filtered list of tours is presented to the user for viewing.
 6. **Quality Requirements:** The filtering operation should be completed within 1 second.
-

1. **Use Case Name:** View Fairs
 2. **Participating Actor:** Director, Coordinator, Guide, Advisor, Head Secretary.
 3. **Flow of Events:**
 - 3.1. The user selects the "View Fairs" option from the menu.
 - 3.2. The system retrieves and displays a list of all available fairs.
 - 3.3. The system **includes** the Filter Fairs use case to allow the user to narrow down the fair list based on criteria (e.g., date, type).
 - 3.4. The user selects a specific fair from the list to view its detailed information.
 - 3.5. The system displays the fair details, including the date, time, participant count, and status.
 4. **Entry Condition:** The user has navigated to the fair viewing section.
 5. **Exit Condition:** The user has viewed the desired fair information and returns to the previous menu.
 6. **Quality Requirements:** The list of fairs should be displayed within 2 seconds after the user initiates the view. Also, the system must update the fair list in real time if new fairs are added or removed.
-

1. **Use Case Name:** Filter Fairs
 2. **Participating Actor:** Director, Coordinator, Guide, Advisor, Head Secretary.
 3. **Flow of Events:**
 - 3.1. The user chooses the "Filter" option to refine the list of fairs.
 - 3.2. The system prompts the user to select filtering criteria, such as date or status.
 - 3.3. The user inputs the desired filter criteria and confirms their selection.
 - 3.4. The system applies the filters and displays a refined list of fairs matching the specified criteria.
 4. **Entry Condition:** The list of fairs is displayed to the user.
 5. **Exit Condition:** The filtered list of fairs is presented to the user for viewing.
 6. **Quality Requirements:** The filtering operation should be completed within 1 second.
-

1. **Use Case Name:** Self Assign to an Upcoming Tour
 2. **Participating Actor:** Guide
 3. **Flow of Events:**
 - 3.1. The guide selects an upcoming tour they wish to self-assign to.
 - 3.2. The system checks if the tour needs a guide by extending the Check Guide Capacity use case.
 - 3.3. If the tour needs a guide, the system allows them to confirm the self-assignment.
 - 3.4. The system updates the tour details with the assigned guide.
 4. **Entry Condition:** The guide has accessed the list of upcoming tours.
 5. **Exit Condition:** The guide is successfully assigned to the selected tour, or an error message is displayed.
 6. **Quality Requirements:** The assignment process should be completed within 2 seconds.
-

1. **Use Case Name:** Self Assign to an Upcoming Fair
 2. **Participating Actor:** Guide
 3. **Flow of Events:**
 - 3.1. The guide selects an upcoming fair they wish to self-assign to.
 - 3.2. The system checks if the fair needs a guide by extending the Check Guide Capacity use case.
 - 3.3. If the fair needs a guide, the system allows them to confirm the self-assignment.
 - 3.4. The system updates the fair details with the assigned guide.
 4. **Entry Condition:** The guide has accessed the list of upcoming fairs.
 5. **Exit Condition:** The guide is successfully assigned to the selected fair, or an error message is displayed.
 6. **Quality Requirements:** The assignment process should be completed within 2 seconds.
-

1. **Use Case Name:** Manually Assign Guide(s) to a Tour
 2. **Participating Actor:** Advisor
 3. **Flow of Events:**
 - 3.1. The advisor selects a guide from the list to assign to the tour.
 - 3.2. The system checks guide capacity by extending the Check Guide Capacity use case.
 - 3.3. If the tour needs a guide, the system confirms the assignment.
 - 3.4. The system updates the tour details with the assigned guide(s).
 4. **Entry Condition:** The advisor has selected a fair requiring guide assignment.
 5. **Exit Condition:** The selected guide is successfully assigned to the selected tour, or an error message is displayed.
 6. **Quality Requirements:** The assignment process should be completed within 2 seconds.
-

1. **Use Case Name:** Manually Assign Guide(s) to a Fair
2. **Participating Actor:** Coordinator and Director
3. **Flow of Events:**

- 3.1. The participating actors select a guide from the list to assign to the fair.
 - 3.2. The system checks guide capacity by extending the Check Guide Capacity use case.
 - 3.3. If the fair needs a guide, the system confirms the assignment.
 - 3.4. The system updates the fair details with the assigned guide(s).
 4. **Entry Condition:** The participating actors have selected a fair requiring a guide assignment.
 5. **Exit Condition:** The selected guide is successfully assigned to the selected fair, or an error message is displayed.
 6. **Quality Requirements:** The assignment process should be completed within 2 seconds.
-

1. **Use Case Name:** Check Guide Capacity
 2. **Participating Actor:** Guide
 3. **Flow of Events:**
 - 3.1. The system automatically triggers the Check Guide Capacity use case when an assignment attempt is made.
 - 3.2. The system checks if the maximum number of required guides for the event has already been assigned.
 - 3.3. If the current capacity is sufficient, the system prevents the new assignment and displays a message indicating that no additional guides are needed for this event.
 - 3.4. If more guides are still needed, the system allows the assignment to proceed without interruption.
 4. **Entry Condition:** The system receives an assignment request for a guide to an event.
 5. **Exit Condition:** The system either permits the guide assignment or blocks it if the capacity is already met.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** View Profile
 2. **Participating Actor:** Director, Coordinator, Guide, Advisor, Head Secretary.
 3. **Flow of Events:**
 - 3.1. The user selects the "View Profile" option.
 - 3.2. The system retrieves the user's profile information from the database.
 - 3.3. The system displays the profile information on the screen.
 4. **Entry Condition:** The user navigates to the "Profile" section from the main menu.
 5. **Exit Condition:** The user successfully views their profile information or exits the profile view.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Update Personal Information
2. **Participating Actor:** Director, Coordinator, Guide, Advisor, Head Secretary.
3. **Flow of Events:**
 - 3.1. The user clicks on the "Edit" button to update their personal information.
 - 3.2. The system enables the input fields for editable information.
 - 3.3. The user modifies the desired fields and submits the changes.
 - 3.4. The system validates the input data.
 - 3.5. If the data is valid, the system updates the user's profile in the database.

3.6. A confirmation message is displayed to the user.

4. **Entry Condition:** The user selects the "Update Personal Information" option while viewing their profile.
 5. **Exit Condition:** The user's personal information is successfully updated, or they cancel the update process.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Create New User
 2. **Participating Actor:** Coordinator
 3. **Flow of Events:**
 - 3.1. The Coordinator accesses the "Create New User" interface from the dashboard.
 - 3.2. The system prompts the Coordinator to enter the details for the new user.
 - 3.3. The system creates a new user account.
 - 3.4. The system triggers the "Credential Notification" use case to notify the new user of their login credentials.
 4. **Entry Condition:** The Coordinator selects the option to create a new user from the admin dashboard.
 5. **Exit Condition:** A new user account is created, and the user is notified with their credentials via email.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Credential Notification
 2. **Participating Actor:** Mail Service
 3. **Flow of Events:**
 - 3.1. After the new user account is successfully created, the system generates an email notification that includes credentials and first-time login instructions.
 - 3.2. The system sends the email to the new user's email address.
 4. **Entry Condition:** A new user account must have been successfully created in the system.
 5. **Exit Condition:** The credentials are sent to the new user successfully.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Send Feedback, Google Forms
 2. **Participating Actor:** Counselor and Student
 3. **Flow of Events:**
 - 3.1. The actors access the feedback form through a QR code after they visit the university.
 - 3.2. The system prompts the actors to enter their feedback.
 - 3.3. The actors submit the feedback form via Google Forms.
 4. **Entry Condition:** The actors have accessed the feedback form and filled it out.
 5. **Exit Condition:** The feedback is successfully recorded.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Log Working Hours
 2. **Participating Actor:** Guide
 3. **Flow of Events:**
 - 3.1. The guide logs into the system and accesses the "Log Working Hours" feature.
 - 3.2. The system prompts the guide to enter the total hours worked during the current month.
 - 3.3. The guide submits the working hours.
 - 3.4. The system validates the input to ensure the hours are numeric.
 4. **Entry Condition:** The guide has accessed the log working hours feature.
 5. **Exit Condition:** The working hours are successfully logged in the system.
 6. **Quality Requirements:** -
-

2.3 Statistics Package

1. **Use Case Name:** View Statistics
 2. **Participating Actor:** Director, Coordinator
 3. **Flow of Events:**
 - 3.1. The actor logs in to his/her account.
 - 3.2. The actor navigates the statistics page.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics.
 5. **Exit Condition:** The actor is redirected to the statistics page.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** View Data Analysis Statistics
 2. **Participating Actor:** Director, Coordinator
 3. **Flow of Events:**
 - 3.1. The actor logs in to his/her account.
 - 3.2. The actor navigates the statistics page.
 - 3.3. The actor selects the data analysis part.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the data analytics part.
 5. **Exit Condition:** The actor is redirected to the data analysis page.
 6. **Quality Requirements:**
 - 6.1. The data analysis section should be easily accessible from the statistics page with one click.
-

1. **Use Case Name:** View Guide Information
 2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor logs in to his/her account.
 - 3.2. The actor navigates the statistics page.
 - 3.3. The actor selects the guide information part.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 5. **Exit Condition:** The actor is redirected to the guide information tab.
 6. **Quality Requirements:**
 - 6.1. This state should be directly accessible from the statistics page with one click.
 - 6.2. The guide information should be up-to-date and accurately reflect the current status of the guide.
-

1. **Use Case Name:** View Completed Events' Statistics
 2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor logs in to his/her account.
 - 3.2. The actor navigates the statistics page.
 - 3.3. The actor selects the completed event statistics part.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the completed event statistics part.
 5. **Exit Condition:** The actor is redirected to the Completed Events tab.
 6. **Quality Requirements:**
 - 6.1. The completed event statistics should be easily accessible from the statistics page with one click.
 - 6.2. The completed event statistics section should present the data in a table format for better analysis and readability.
-

1. **Use Case Name:** View Tour Feedback
2. **Participating Actor:** Director, Advisor, Coordinator and Head Secretary
3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the tour feedback part.
4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and tour feedback part.
 - 4.3. The tour must be completed to view its feedback.
5. **Exit Condition:** The actor is redirected to the tour feedback form.
6. **Quality Requirements:**

- 6.1. The tour feedback section should be easily accessible from the statistics page with a single click.
 - 6.2. The feedback should only be viewable for completed tours, ensuring that incomplete tours cannot be accessed for feedback.
-

1. **Use Case Name:** View Top High Schools
 2. **Participating Actor:** Director, Coordinator
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the data analysis part.
 - 3.3. The actor accesses the top high school section.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the data analytics part.
 - 4.3. The actor should select the top high school option.
 5. **Exit Condition:** The actor is redirected to the list of top high schools.
 6. **Quality Requirements:**
 - 6.1. This state should be directly accessible from the data analysis page with a drop down list to select a high school from all possible ones.
 - 6.2. The ordering algorithm that will be created should update data concurrently.
 - 6.3. The director should be notified by the external notification actor in case of any change in top high schools.
-

1. **Use Case Name:** View Student Rankings
 2. **Participating Actor:** Director, Coordinator
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the data analysis part.
 - 3.3. The actor accesses the student rankings.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the data analytics part.
 - 4.3. The actor should select the student rankings option.
 5. **Exit Condition:** The actor is redirected to the student ranking table.
 6. **Quality Requirements:** This state should be directly accessible from the data analysis page with a filtering system to select top students or filter by their high schools.
-

1. **Use Case Name:** View Working Logs
2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary
3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.

- 3.2. The actor selects the guide information part.
 - 3.3. The actor accesses the working logs.
 - 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 - 4.3. The actor should select the working logs option.
 - 5. **Exit Condition:** The actor is redirected to the working logs page.
 - 6. **Quality Requirements:**
 - 6.1. The system should ensure that working logs are updated every 30 seconds to reflect the latest data.
 - 6.2. The logs should be filtered and sorted based on date or event type for ease of access.
-

- 1. **Use Case Name:** View Department
 - 2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary
 - 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the guide information part.
 - 3.3. The actor can directly see the department of the guide.
 - 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 - 4.3. The actor should see the guide's department.
 - 5. **Exit Condition:** The actor is on the guide information page.
 - 6. **Quality Requirements:** -
-

- 1. **Use Case Name:** View Contact Information
 - 2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary
 - 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the guide information part.
 - 3.3. The actor can directly see the guide's contact information.
 - 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 - 4.3. The actor should see the guide's contact information.
 - 5. **Exit Condition:** The actor is on the guide information page.
 - 6. **Quality Requirements:** -
-

- 1. **Use Case Name:** View High School Tour Statistics
- 2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary

3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the completed events part.
 - 3.3. The actor chooses the high school tour statistics part.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the completed events part.
 - 4.3. The actor should proceed with the high school tour statistics part.
 5. **Exit Condition:** The actor is redirected to the high school tours page.
 6. **Quality Requirements:**
 - 6.1. The statistics should be labeled with table rows and include sorting/filtering options for retrieving the particular schools.
-

1. **Use Case Name:** View Individual Tour Statistics
 2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor should open the related page to view the statistics and navigate to the completed events part.
 - 3.2. The actor chooses the individual tour statistics part.
 4. **Entry Condition:**
 - 4.1. Inherited by the Submit Application case
 - 4.2. The actor should proceed with the individual tour statistics part.
 5. **Exit Condition:** The actor is redirected to the individual tours page.
 6. **Quality Requirements:**
 - 6.1. The statistics should be presented in a table format with search and filter options.
-

1. **Use Case Name:** View Student's Personal Information
2. **Participating Actor:** Director, Coordinator, Advisor and Head Secretary
3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the completed events part.
 - 3.3. The actor chooses the individual tour statistics part.
 - 3.4. The actor proceeds to the student's personal information tab.
4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the completed events part.
 - 4.3. The actor should proceed with the individual tour statistics part.
 - 4.4. The actor should select the student's personal information tab.
 - 4.5. This state is **included** in the individual tour statistics section.
5. **Exit Condition:** The actor is redirected to the student's personal information.
6. **Quality Requirements:** -

3. Tech Stack

In this report, we will explain the main technologies we are going to use in our project in two parts: Backend and Frontend.

Backend:

The programming language for the backend is chosen as **Java** since every member of the team is proficient in Java. It was then decided that the project will be built with the **Spring Boot** framework because it is known to work well with web applications and makes setup and configuration processes easy. Spring Boot integrates well with **microservices**, which will be the architectural pattern of the project, and we will build services that implement **RESTful APIs** with Spring. For the database, we will use **PostgreSQL**, which is an object-relational database system. To document and test the services, **Swagger** and **Postman** will be used. In the latter part of the project, a caching system might be implemented using **Redis**.

Frontend:

For the frontend, we will use **Javascript** as the programming language. For development and styling, **HTML** and **CSS** will be used. We want a user-friendly and informative user interface for our project, thus the variety and the design of UI components are crucial. For this reason, online and open-source UI libraries will be used. We are planning to use **the Bootstrap** framework since it provides a collection of CSS and JavaScript components like grids, buttons, forms, modals, and navigation bars. Since we have a limited time limit, It's particularly good for us to set up a UI quickly without much custom styling. Additionally, we import the **jQuery** library to enhance interactivity, which allows us to create a dynamic and responsive interface with less code.

In conclusion, we believe that our backend and frontend will complement each other to create a successful product.
