Use Case Diagram

Use Case Textual Descriptions

Manage Tours Package

1. **Use Case Name:** Guide Actions
 2. **Participating Actor:** Guide
 3. **Flow of Events:** This use case encapsulates the functionalities of tours provided by the system for guides.
 - 3.1. The guide logs in.
 - 3.2. The system displays the available actions for the guide.
 - 3.3. The guide selects an action.
 - 3.4. The system performs the corresponding process.
 4. **Entry Condition:** The guide must be logged into the system.
 5. **Exit Condition:**
 - 5.1. The guide action is completed and reflected in the system.
 - 5.2. The guide logs out.
 6. **Quality Requirements:** At any point during the flow of events, this use case can **include** Log Working Hours, Self-Assign to an Upcoming Tour, Display the QR Code for the Feedback Form, and View Upcoming Tours use cases.
-

1. **Use Case Name:** Log Working Hours
 2. **Participating Actor:** Guide
 3. **Flow of Events:**
 - 3.1. The guide logs their working hours.
 - 3.2. The system saves the information.
 - 3.3. Each month, the working hours reset automatically.
 4. **Entry Condition:**
 - 4.1. The guide must be logged in.
 - 4.2. The guide must have participated in at least one event.
 5. **Exit Condition:** The guide clicks the save button.
 6. **Quality Requirements:** The working hours must be saved for statistics before monthly refreshments.
-

1. **Use Case Name:** Self-Assign to an Upcoming Tour
2. **Participating Actor:** Guide
3. **Flow of Events:**
 - 3.1. The guide views the upcoming tours.
 - 3.2. The system checks the capacity for the selected tour (extends **Check Guide Capacity**).
 - 3.3. The guide assigns themselves.
4. **Entry Condition:**
 - 4.1. There must be at least one approved tour.
 - 4.2. There must be enough guide capacity.
5. **Exit Condition:** The guide saves the choice.
6. **Quality Requirements:** -

-
1. **Use Case Name:** Display the QR Code for Feedback Form
 2. **Participating Actor:** Guide
 3. **Flow of Events:**
 - 3.1. The guide completes their assigned tour.
 - 3.2. The guide displays the QR code for the feedback form.
 4. **Entry Condition:** The guide must be assigned to a tour.
 5. **Exit Condition:** The guide closes the QR code.
 6. **Quality Requirements:** The system should ensure that the QR code is displayed clearly and is large enough for easy scanning.
-

1. **Use Case Name:** Send Feedback Form
 2. **Participating Actor:** Student/Counselor
 3. **Flow of Events:**
 - 3.1. The student/counselor scans the QR code displayed by the guide.
 - 3.2. They fill out the form.
 - 3.3. They submit the form.
 4. **Entry Condition:** The student/counselor must have scanned the QR code and been directed to the feedback form.
 5. **Exit Condition:** The submit button is clicked.
 6. **Quality Requirements:** The feedback form should be user-friendly and easy to complete.
-

1. **Use Case Name:** View Tours
 2. **Participating Actor:** Inherited by View All Tours and View Upcoming Tours.
 3. **Flow of Events:**
 - 3.1. The system retrieves the tour list based on the criteria.
 - 3.2. The system displays the retrieved list of tours.
 4. **Entry Condition:**
 - 4.1. There must be tours available in the system.
 - 4.2. The user must be logged in.
 5. **Exit Condition:** The system displays the tour list to the requesting use case.
 6. **Quality Requirements:**
 - 6.1. The information should be clear and organized for easy viewing.
 - 6.2. This view should support filtering the tours based on criteria such as date, type, or status.
-

1. **Use Case Name:** View Upcoming Tours
 2. **Participating Actor:** Guide
 3. **Flow of Events:** **Inherited** from View Tours use case, specifically retrieving upcoming tours based on the current date.
 4. **Entry Condition:** **Inherited** from View Tours use case.
 5. **Exit Condition:** **Inherited** from View Tours use case.
 6. **Quality Requirements:** **Inherited** from View Tours use case.
-

1. **Use Case Name:** View All Tours
 2. **Participating Actor:** Director, Coordinator, Head Secretary and Advisor
 3. **Flow of Events:** **Inherited** from View Tours use case, retrieving the complete list of tours without restriction.
 4. **Entry Condition:** **Inherited** from View Tours use case.
 5. **Exit Condition:** **Inherited** from View Tours use case.
 6. **Quality Requirements:** **Inherited** from View Tours use case.
-

1. **Use Case Name:** Advisor Actions
 2. **Participating Actor:** Advisor
 3. **Flow of Events:** This use case encapsulates the functionalities provided by the system for advisors.
 - 3.1. The advisor logs in.
 - 3.2. The system displays the advisor's available actions.
 - 3.3. The advisor selects an action.
 - 3.4. The system performs the corresponding process.
 4. **Entry Condition:** The advisor must be logged into the system.
 5. **Exit Condition:**
 - 5.1. The advisor's action is completed and reflected in the system.
 - 5.2. The advisor logs out.
 6. **Quality Requirements:** At any point during the flow of events, this use case can include Accept/Reject Tour Application and View All Tours use cases.
-

1. **Use Case Name:** Accept/Reject Tour Application
 2. **Participating Actor:** Advisor
 3. **Flow of Events:**
 - 3.1. High school or individual submits an application.
 - 3.2. The advisor accepts or rejects the application.
 - 3.3. The high school is notified via email.
 4. **Entry Condition:**
 - 4.1. The advisor must be logged into the system.
 - 4.2. The school or prospective student must submit an application form.
 5. **Exit Condition:** The advisor completes their choice.
 6. **Quality Requirements:** The advisor must take action at least two weeks before the tour date. Moreover, at any point during the flow of events, this use case can **include** the Notify High School use case.
-

1. **Use Case Name:** Cancel Tour
2. **Participating Actor:** Head Secretary
3. **Flow of Events:**
 - 3.1. The school counselor/student reaches out to the head secretary for cancellation.
 - 3.2. The Head Secretary cancels the approved tour.
4. **Entry Condition:**
 - 4.1. The head secretary must be logged into the system.

- 4.2. The head secretary must be informed.
 5. **Exit Condition:** The head secretary removes the tour.
 6. **Quality Requirements:** The canceled tour must be removed quickly, as delays can affect the advisor's decision-making process.
-

Manage Fairs Package

1. **Use Case Name:** Guide Actions
 2. **Participating Actor:** Guide
 3. **Flow of Events:** This use case encapsulates the functionalities of fairs provided by the system for guides.
 - 3.1. The guide logs in.
 - 3.2. The system displays the available actions for the guide.
 - 3.3. The guide selects an action.
 - 3.4. The system performs the corresponding process.
 4. **Entry Condition:** The guide must be logged into the system.
 5. **Exit Condition:**
 - 5.1. The guide action is completed and reflected in the system.
 - 5.2. The guide logs out.
 6. **Quality Requirements:** At any point during the flow of events, this use case can **include** Log Working Hours, Self-Assign to an Upcoming Fair, Display the QR Code for the Feedback Form, and View Upcoming Fairs use cases.
-

1. **Use Case Name:** Log Working Hours
 2. **Participating Actor:** Guide
 3. **Flow of Events:**
 - 3.1. The guide logs their working hours.
 - 3.2. The system saves the information.
 - 3.3. Each month, the working hours reset automatically.
 4. **Entry Condition:**
 - 4.1. The guide must be logged in.
 - 4.2. The guide must have participated in at least one event.
 5. **Exit Condition:** The guide clicks the save button.
 6. **Quality Requirements:** The working hours must be saved for statistics before monthly refreshments.
-

1. **Use Case Name:** Self-Assign to an Upcoming Fair
2. **Participating Actor:** Guide
3. **Flow of Events:**
 - 3.1. The guide views the upcoming fairs.
 - 3.2. The system checks the capacity for the selected tour (extends **Check Guide Capacity**).
 - 3.3. The guide assigns themselves.
4. **Entry Condition:**

- 4.1. There must be at least one approved fair.
 - 4.2. There must be enough guide capacity.
 5. **Exit Condition:** The guide saves the choice.
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Send Feedback Form
 2. **Participating Actor:** Student/Counselor
 3. **Flow of Events:**
 - 3.1. The student/counselor scans the QR code displayed by the guide.
 - 3.2. They fill out the form.
 - 3.3. They submit the form.
 4. **Entry Condition:** The student/counselor must have scanned the QR code and been directed to the feedback form.
 5. **Exit Condition:** The submit button is clicked.
 6. **Quality Requirements:** The feedback form should be user-friendly and easy to complete.
-

1. **Use Case Name:** View Fairs
 2. **Participating Actor:** Inherited by View All Fairs and View Upcoming Fairs.
 3. **Flow of Events:**
 - 3.1. The system retrieves the fair list based on the criteria.
 - 3.2. The system displays the retrieved list of fairs.
 4. **Entry Condition:**
 - 4.1. There must be fairs available in the system.
 - 4.2. The user must be logged in.
 5. **Exit Condition:** The system displays the fair list to the requesting use case.
 6. **Quality Requirements:**
 - 6.1. The information should be clear and organized for easy viewing.
 - 6.2. This view should support filtering the fairs based on criteria such as date, type, or status.
-

1. **Use Case Name:** View Upcoming Fairs
 2. **Participating Actor:** Guide
 3. **Flow of Events:** **Inherited** from View Fairs use case, specifically retrieving upcoming fairs based on the current date.
 4. **Entry Condition:** **Inherited** from View Fairs use case.
 5. **Exit Condition:** **Inherited** from View Fairs use case.
 6. **Quality Requirements:** **Inherited** from View Fairs use case.
-

1. **Use Case Name:** View All Fairs
2. **Participating Actor:** Director and Coordinator
3. **Flow of Events:** **Inherited** from View Fairs use case, retrieving the complete list of fairs without restriction.
4. **Entry Condition:** **Inherited** from View Fairs use case.
5. **Exit Condition:** **Inherited** from View Fairs use case.

6. **Quality Requirements: Inherited** from View Fairs use case.

1. **Use Case Name:** Fair Manager Actions
 2. **Participating Actor:** Director and Coordinator
 3. **Flow of Events:** This use case encapsulates the functionalities provided by the system for managing fairs.
 - 3.1. The actor logs in.
 - 3.2. The system displays the actor's available actions for managing fairs.
 - 3.3. The actor selects an action.
 - 3.4. The system performs the corresponding process.
 4. **Entry Condition:** The actor must be logged into the system.
 5. **Exit Condition:**
 - 5.1. The actor's action is completed and reflected in the system.
 - 5.2. The actor logs out.
 6. **Quality Requirements:** At any point during the flow of events, this use case can **include** Accept/Reject Fair Application and View All Fairs use cases.
-

1. **Use Case Name:** Accept/Reject Fair Application
 2. **Participating Actor:** Director and Coordinator
 3. **Flow of Events:**
 - 3.1. High school submits an application.
 - 3.2. The actor accepts or rejects the application.
 - 3.3. The high school is notified via email.
 4. **Entry Condition:**
 - 4.1. The actor must be logged into the system.
 - 4.2. The school must submit an application form.
 5. **Exit Condition:** The actor completes their choice.
 6. **Quality Requirements:** The actor must take action at least two weeks before the tour date. Moreover, at any point during the flow of events, this use case can **include** the Notify High School use case.
-

1. **Use Case Name:** Cancel Fair
 2. **Participating Actor:** Director and Coordinator
 3. **Flow of Events:**
 - 3.1. The school counselor reaches out to the actor for cancellation.
 - 3.2. The actor cancels the approved tour.
 4. **Entry Condition:**
 - 4.1. The actor must be logged into the system.
 - 4.2. The actor must be informed.
 5. **Exit Condition:** The actor removes the tour.
 6. **Quality Requirements:** The canceled fair must be removed quickly, as delays can affect decision-making.
-

1. **Use Case Name:** Display the QR Code for Feedback Form
 2. **Participating Actor:** Director and Coordinator
 3. **Flow of Events:**
 - 3.1. The actor completes the fair.
 - 3.2. The actor displays the QR code for the feedback form.
 4. **Entry Condition:** The fair must be tracked on the system.
 5. **Exit Condition:** The actor closes the QR code.
 6. **Quality Requirements:** The system should ensure that the QR code is displayed clearly and is large enough for easy scanning.
-

Authentication Package

1. **Use Case Name:** Login
 2. **Participating Actor:** Bilkent Information Web Page User
 3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. The actor presses the login button on the main page.
 4. **Entry Condition:** The actor should be authorized to log in.
 5. **Exit Condition:** The actor should enter their credentials.
 6. **Quality Requirements:** The login Page should include exception handling, preventing corner cases where the actor couldn't enter the page.
-

1. **Use Case Name:** Non-Existing Username
 2. **Participating Actor:** Bilkent Information Web Page User
 3. **Flow of Events:**

 - 4.2. The actor should press forgot password button.
 - 4.3. The actor should have a registered e-mail in the database.
 - 4.4. The actor should mistype the verification code.
 5. **Exit Condition:** The actor needs to type the correct verification code.
 6. **Quality Requirements:** One of the exception handling cases for the forgot password use case.
-

1. **Use Case Name:** Create User
 2. **Participating Actor:** Coordinator
 3. **Flow of Events:**
 - 3.1. The actor logs in to his account.
 - 3.2. The actor presses the create user button.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to enter the create user button.
 5. **Exit Condition:** The actor can cancel creating the user or complete the process.
 6. **Quality Requirements:** This important feature enables the coordinator to create guides by his/her own control.
-

1. **Use Case Name:** Enter User Information
 2. **Participating Actor:** Coordinator
 3. **Flow of Events:**
 - 3.1. The actor logs in to his account.
 - 3.2. The actor presses the create user button.
 - 3.3. The actor completes the process by entering the user's credentials.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to enter the create user button.
 - 4.3. The actor should click the Create User button.
 5. **Exit Condition:** The actor can redirect to the main page.
 6. **Quality Requirements:** This important feature enables the coordinator to create guides by his/her control by entering the guides' credentials **included** by the create user case.
-

1. **Use Case Name:** Credential Notification by E-Mail
 2. **Participating Actor:** Coordinator
 3. **Flow of Events:**
 - 3.1. The actor logs in to his account.
 - 3.2. The actor presses the create user button.
 - 3.3. The actor completes the process and clicks the send credentials to the guide button.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to enter the create user button.
 - 4.3. The actor should complete the Enter User Information Case
 5. **Exit Condition:** The actor can redirect to the main page.
 6. **Quality Requirements:** This important feature enables the coordinator to create guides by his/her control by entering the guides' credentials included in the Enter User Information case.
-

Main Page Package

1. **Use Case Name:** View Main Page
 2. **Participating Actor:** All Actors
 3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. The actor presses the main page section.
 4. **Entry Condition:** The actor should enter the website.
 5. **Exit Condition:** -
 6. **Quality Requirements:** -
-

1. **Use Case Name:** Get Informed
 2. **Participating Actor:** Student and Counselor
 3. **Flow of Events:**
 - 3.1. The actor opens the website
 - 3.2. The actor presses the main page section.
 - 3.3. The actor is redirected to the get informed section.
 4. **Entry Condition:** The actor should enter the website.

 - 4.2. The actor should open the related page to view the statistics and navigate to the data analytics part.
 5. **Exit Condition:** The actor can redirect to the main page or proceed.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **inherited** from the view Statistics Part.
-

1. **Use Case Name:** View Guide Information
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor logs in to his/her account.
 - 3.2. The actor navigates the statistics page.
 - 3.3. The actor selects the guide information part.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 5. **Exit Condition:** The actor can redirect to the main page or proceed.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **inherited** from the view Statistics Part.
-

1. **Use Case Name:** View Completed Events' Statistics
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor logs in to his/her account.
 - 3.2. The actor navigates the statistics page.
 - 3.3. The actor selects the completed event statistics part.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the completed event statistics part.
 5. **Exit Condition:** The actor can redirect to the main page or proceed.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **inherited** from the view Statistics Part.
-

1. **Use Case Name:** View Top High Schools

2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the data analysis part.
 - 3.3. The actor accesses the top high school section.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the data analytics part.
 - 4.3. The actor should select the top high school option.
 5. **Exit Condition:** The actor can redirect to the main or previous pages.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **included** from the data analysis part.
-

1. **Use Case Name:** View Student Rankings
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the data analysis part.
 - 3.3. The actor accesses the student rankings.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the data analytics part.
 - 4.3. The actor should select the student rankings option.
 5. **Exit Condition:** The actor can redirect to the main or previous pages.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **included** from the data analysis part.
-

1. **Use Case Name:** View Working Logs
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the guide information part.
 - 3.3. The actor accesses the working logs.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 - 4.3. The actor should select the working logs option.
 5. **Exit Condition:** The actor can redirect to the main or previous pages.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **included** from the guide information part.
-

1. **Use Case Name:** View Department
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the guide information part.
 - 3.3. The actor can directly see the department of the guide.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 - 4.3. The actor should see the guide's department.
 5. **Exit Condition:** The actor can redirect to the main or previous pages.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **included** from the guide information part.
-

1. **Use Case Name:** View Contact Information
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the guide information part.
 - 3.3. The actor can directly see the contact information of the guide.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the guide information part.
 - 4.3. The actor should see the guide's contact information.
 5. **Exit Condition:** The actor can redirect to the main or previous pages.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **included** from the guide information part.
-

1. **Use Case Name:** View High School Tour Statistics
2. **Participating Actor:** Director, Coordinator and Head Secretary
3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the completed events part.
 - 3.3. The actor chooses the high school tour statistics part.
4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the completed events part.
 - 4.3. The actor should proceed with the high school tour statistics part.
5. **Exit Condition:** The actor can redirect to the main or previous pages.
6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **inherited** from the completed events part.

-
1. **Use Case Name:** View Individual Tour Statistics
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. Inherited by the Submit Application case
 - 3.2. The actor chooses individual tour statistics part.
 4. **Entry Condition:**
 - 4.1. Inherited by the Submit Application case
 - 4.2. The actor should proceed with the individual tour statistics part.
 5. **Exit Condition:** Inherited by the Submit Application case
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **inherited** from the completed events part.
-

1. **Use Case Name:** View Tour Feedback
 2. **Participating Actor:** Director, Coordinator and Head Secretary
 3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the completed events part.
 - 3.3. The actor chooses the high school tour statistics part.
 - 3.4. The actor should select the tour feedback field.
 4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the completed events part.
 - 4.3. The actor should proceed with the high school tour statistics part.
 - 4.4. The actor should select the tour feedback tab.
 5. **Exit Condition:** The actor can redirect to the main or previous pages.
 6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **included** by the completed events part.
-

1. **Use Case Name:** View Tour Feedback
2. **Participating Actor:** Director, Coordinator and Head Secretary
3. **Flow of Events:**
 - 3.1. The actor navigates the statistics page.
 - 3.2. The actor selects the completed events part.
 - 3.3. The actor chooses the individual tour statistics part.
 - 3.4. The actor proceeds student personal information tab.
4. **Entry Condition:**
 - 4.1. The actor should be authorized to log in.
 - 4.2. The actor should open the related page to view the statistics and navigate to the completed events part.
 - 4.3. The actor should proceed with the individual tour statistics part.
 - 4.4. The actor should select student personal information tab.
5. **Exit Condition:** The actor can redirect to the main or previous pages.

6. **Quality Requirements:** The statistics page enables the information office to evaluate their yearly performance regarding the data inside, this state **included** by the individual tour statistics part.

Tech Stack

In this report, we will explain the main technologies we are going to use in our project in two parts: Backend and Frontend.

Backend:

The programming language for the backend is chosen as **Java** since every member of the team is proficient in Java. It was then decided that the project will be built with the **Spring Boot** framework because it is known to work well with web applications and makes setup and configuration processes easy. Spring Boot integrates well with **microservices**, which will be the architectural pattern of the project, and we will build services that implement **RESTful APIs** with Spring. For the database, we will use **PostgreSQL**, which is an object-relational database system. To document and test the services, **Swagger** and **Postman** will be used. In the latter part of the project, a caching system might be implemented using **Redis**.

Frontend:

For the frontend, we will use **Javascript** as the programming language. For development and styling, **HTML** and **CSS** will be used. We want a user-friendly and informative user interface for our project, thus the variety and the design of UI components are crucial. For this reason, online and open-source UI libraries will be used.

In conclusion, we believe that our backend and frontend will complement each other to create a successful product.
